_Attraverso la luce The radiance of light

Forte di una storia decennale che affonda le sue radici nella più autentica tradizione vetraia veneziana, SYLCOM interpreta il presente e si proietta al futuro con un linguaggio internazionale che *attraverso la luce* descrive i suoi valori di esperienza, innovazione e propensione alla bellezza.

Luce intesa come energia che illumina ogni tipo di ambiente, impulso creativo che genera lampadari di alto valore artistico, entità viva che avvalorata la qualità del vetro, ne accende i colori, ne definisce le forme e consente di guardare attraverso.

In SYLCOM l'alto artigianato incontra il design, la tradizione incontra la tecnologia divenendo parte di quell'atto primordiale che consente il miracolo del vetro inteso come assemblaggio alchemico di elementi naturali.

Il fuoco, la sabbia, i pigmenti, l'acqua grazie all'intervento umano, si trasformano in materia plasmabile per evolvere in forme ardite, armoniche geometrie che echeggiano i profili della laguna veneziana.

Venezia, città onirica ma viva e pulsante, si conferma l'inesauribile fonte di ispirazione per i creativi di oggi come fu per i maestri del passato in tutti i settori artistici.

Nei profili sinuosi delle collezioni SYLCOM si rivedono i capolavori di chiese e palazzi: bifore, sculture, stucchi, modanature.

With a ten-year history and roots imbedded in the most authentic Venetian glassmaking tradition, SYLCOM interprets present-day tastes and anticipates the future with a global language which - via the radiance of light - defines its values in terms of expertise, innovation and passion for beauty.

Light is thus intended as energy that illuminates all types of interiors via creative dynamism giving rise to highly artistic lighting fixtures that enhance the quality of the glass, its transparency and its colours and shapes.

In SYLCOM, skillful craftsmanship is combined with refined design, tradition and technology, becoming part of an age-old process or miracle of glass making intended as an alchemical assemblage of natural elements.

Expert artisans transform fire, sand, pigments and water into a supple matter which enables them to model creative shapes that evoke the contours of the Venetian lagoon.

A dreamlike yet vibrant city, Venice is still an endless source of inspiration in all fields of art for today's artists as it was for those of the past.

The graceful contours of the SYLCOM collections reflect the artworks of churches and palazzi, such as mullioned windows, sculptures, stuccos and molded cornices.

L'essenza stessa del vetro, finemente lavorato da mani esperte, racconta di una città sospesa tra acqua e luce. Le collezioni portano il nome dei dogi, raccontano storie nuove, descrivono emozioni eterne.

La palette cromatica attinge alla natura stessa della città: il rosso rosato del cocciopesto, il verde dell'acqua, il blu dei cieli affrescati, il giallo dei mosaici dorati, delle sabbie e dei tramonti.

Le regole della lavorazione del vetro tramandate fino ad oggi si dotano della tecnologia LED garantendo ai lampadari autenticità e efficienza, sia nella riproposizione dei classici che nelle proposte dei designer contemporanei.

Lampadari che sembrano forgiati dalla luce che si materializza per ornare gli spazi di oggi con l'eleganza e la classe con cui illuminava i saloni degli antichi palazzi della Serenissima.

Attualizzandosi in una veste che esalta i caratteri del suo dna, SYLCOM si conferma protagonista nel settore dell'illuminazione decorativa affiancando i progettisti della luce con prodotti custom e un'ampia collezione di piccoli e grandi capolavori.

The very essence of glass - finely fashioned by expert hands - narrates the history of a city suspended between water and light. The collections are named after Venetian Doges, new or ageless passions.

The colour palette draws on the very nature of the city: the pinkish red of the cocciopesto facades, the green of the water, the blue of the frescoed skies, the yellow of the golden mosaics, the sand and the sunsets.

The glass-making rules handed down through the centuries have been extended to include LED technology in order to ensure lighting efficiency, both in the reinterpretation of classic versions and in those created by contemporary designers.

The lighting fixtures seem forged by the light to illuminate present-day interiors with the same class and elegance as the rooms of the palazzi during the times of the Serenissima Republic of Venice.

SYLCOM's updating agenda enhances the qualities of its traditional heritage, confirming its role as a major player in the decorative lighting industry with collections that include custom-designed products as well as a wide range of artistic creations.

Ogni fase della produzione Sylcom si basa sul valore del saper fare inteso come un susseguirsi di azioni umane nel rispetto di un motto condiviso: **bellezza che illumina il quotidiano. Ogni pezzo della collezione viene realizzato singolarmente ed è frutto di una profonda conoscenza della tradizione veneziana nella lavorazione del vetro.**

Tutte le materie prime provengono dal territorio italiano e l'intero processo produttivo avviene all'interno dell'azienda, luogo in cui viene posta grande attenzione al singolo dettaglio e da dove ogni prodotto viene immesso nel mercato sotto forma di pezzo unico, dotato di numero progressivo e opportunamente siglato e certificato.

Each stage of the Sylcom production is based on the expertise of its artisans who apply their skills with the aim of creating exquisite beauty that will brighten daily living and routines.

Each piece of the collection is made individually and is the result of in-depth expertise in the art of traditional Venetian glass-making.

All the raw materials required come from Italian regions and the entire production process is carried out within the company with strict care paid to every detail in order to place only unique pieces on the market, each supplied with a progressive number and duly signed and certified.

_Glossario Glossary

Lavorazioni Techniques

- A CALDO** **Un metodo di decorazione in rilievo che permette di aggiungere vetro alla superficie del prodotto mentre il pezzo lavorato è ancora caldo.**
Method of decorating in relief that consists in adding glass to the surface of an item while it is still hot.
- BALOTON** **La lavorazione consiste nell'inglobare, a distanze regolari, alcune bolle d'aria che, con la successiva posa di un secondo strato di vetro, vengono imprigionate nella materia rimanendo ben visibili senza modificare le caratteristiche tecniche del prodotto.**
Technique that consists in trapping minute air bubbles at regular distances between two layers of glass. The bubbles remain clearly visible without changing the features of the product.
- FILO** **Si tratta di una decorazione che consiste nell'applicazione a caldo di un filo di vetro sul bordo superiore di una forma in vetro. Può avere diversi spessori, colori (opachi e trasparenti). Se è ondulato viene chiamato *morise*.**
Decoration that consists in applying a hot glass thread on the upper edge of a glass item. Diverse thickness and colours (opaque and clear) are used. When the decoration is wavy it's called *morise*.
- FOGLIA D'ORO** **Come indica il nome sono sottilissimi fogli di 8 cm x 8 cm che vengono applicati sul vetro nella fase iniziale della lavorazione. Una volta applicata la foglia può essere ricoperta da uno strato vitreo trasparente. Se il vetro viene soffiato la foglia si frantuma creando effetti molto suggestivi. Per quanto riguarda la foglia d'argento è necessario ricoprirla con uno strato vitreo per evitare l'ossidazione dell'argento. Inventata nei centri vetrari del vicino Oriente mediterraneo ebbe larghissima applicazione nelle vetrerie romane, islamiche e veneziane. La soffiatura avviene oggi non solo manualmente, come per il vetro d'arte, ma anche con macchine automatiche.**
The name means gold leaf. Very thin gold leaves or sheets 8 cm x 8 cm, are applied to the glass during the initial production stage. Once applied, the leaf can be coated with a clear glass layer. If the glass is blown the leaf breaks into small fragments, creating exquisite effects. As to silver leaf, it must be covered with a glass layer to prevent oxidation.
Invented in the Eastern Mediterranean glass-making centres, gold leaf was widely used in Roman, Islamic and Venetian glass-making factories. Today, the process is not solely carried out by hand (as with all artistic glass objects), but also with automatic machines.
- INCALMO** **Metodo di lavorazione che permette di unire diversi colori di vetro a caldo creando un singolo prodotto multicolore soffiato in un'unica soluzione. Dato che ogni colore ha caratteristiche di raffreddamento specifiche, solo alcuni di essi possono essere saldati insieme in quanto le diverse tensioni scaturite durante il raffreddamento porterebbero alla rottura del prodotto.**
Process of fusing together many different pieces of coloured glass while the glass is hot and pliable then modelling them into a single, multi-coloured blown-glass object. Every colour pigment has its own specific cooling features thus only some of them can be fused together because the different stress generated while cooling would lead to product breakage.
- INCAMICIATO** **Questa lavorazione consiste nel ricoprire un vetro con un sottile strato vitreo di diverso colore.**
Technique that consists in coating the glass with a thin layer of a different colour.
- MACIE** **Il nome deriva da "macia" che significa macchia. Le macie sono frammenti di vetro solitamente colorati che vengono avvolti attorno ad un vetro bianco conferendogli il colore dei frammenti. Con il termine diminutivo *maciette* si indicano frammenti molto più fini.**
The name derives from "macia" which literally means stain. The macie are usually coloured glass fragments that are arranged on glass to stain it with the colour of the fragments. The diminutive term *maciette* indicates much finer fragments.
- MORRISSE** **Tipica lavorazione muranese, consiste in un cordoncino di vetro dal caratteristico andamento ondulato appoggiato e sagomato sul pezzo durante la lavorazione. Questo filo di vetro caldo viene applicato sulla superficie e pizzicato con le *borselle*.**
Typical Murano decoration technique. It consists of a glass thread with a characteristic wavy pattern applied and modelled on the glass. The hot thread is applied onto a surface and nipped with *borselle* (special pliers).

PULEGÒSO	<p>Derivante dal termine gergale <i>pùlega</i> cioè bollicina, il pulegòso è un vetro dalla superficie scabra, semi opaca o traslucida. Si ottiene includendo molte bollicine d'aria che conferiscono all'oggetto un aspetto butterato simile ad una buccia d'arancia.</p> <p>The name comes from the slang term <i>pùlega</i>, which means bubble. Pulegòso glass has a rough, semi-opaque or translucent surface and is achieved through the inclusion of innumerable air bubbles in the glass which give it a texture similar to an orange peel.</p>
RECÈLA	<p>Utilizzata per appendere fiocchi, pendagli ed in generale elementi decorativi, la racèla è costituita da un'asola in vetro.</p> <p>The racèla is glass loop used to hang bows, pendants and decorative elements in general.</p>
RIGADIN DRITTO E RITORTO	<p>I <i>rigadin</i> sono costolature a righe verticali di un vetro ottenute a soffiatura in uno stampo aperto. Il vetro può essere sottoposto, a caldo, ad una torsione (ritorto). Da qui la differenza tra <i>rigadin dritto</i> o <i>ritorto</i>.</p> <p>Rigadin is the vertical ribbing on the glass achieved by blowing into an open mould with grooves. The glass can also be twisted while hot during the moulding. Hence the difference between <i>rigadin dritto</i> (straight) and <i>rigadin ritorto</i> (twisted).</p>
RUGIADA	<p>Il termine deriva dalle piccole schegge di vetro simili a piccole gocce di rugiada che vengono fuse in ricottura ricoprendo così la superficie.</p> <p>The term derives from small glass shards similar to small dewdrops (<i>rugiada</i>). During production the shards are applied over the surface then the glass is reheated to make them partially melt and adhere, creating a dewdrops effect.</p>
VETRO SOMMERSO	<p>Lavorazione in cui il vetro, durante la lavorazione, viene immerso in crogioli con diversi colori. In questo modo il pezzo sarà composto da più strati trasparenti diversamente colorati anche di grosso spessore.</p> <p>technique in which the glass is submerged (<i>sommerso</i>) into various crucibles with different colours to create a layered effect. The object will thus be composed of several multi-hued clear layers, including very thick layers.</p>
Procedure Procedures	
PARTIA	<p>Indica la ricetta per le composizioni vetrarie con indicati i quantitativi dei vari componenti, le modalità d'uso e di fusione. <i>Partia</i> è un termine muranese che deriva dalla parola <i>partita</i> (divisa) e storicamente consisteva in un "libretto delle ricette" tramandato di padre in figlio e gelosamente conservato per impedire ai concorrenti di copiare procedimenti e colori.</p> <p>Indicates the recipe for glass compositions with the quantities of the various components, methods of use and fusion. <i>Partia</i> is a Muranese term that derives from the word <i>partita</i> (batch) and historically consisted of a "recipe book" handed down from father to son and jealously guarded to prevent competitors from copying procedures and colours.</p>
COLORI IN FOGO	<p>Indica un vetro colorato in fusione mediante ossidi o sali minerali. La locuzione <i>colori in fogo</i> è ancora oggi in uso a Murano.</p> <p>Indicates colored glass in fusion with oxides or mineral salts. The expression "<i>colori in fogo</i>" is still currently used in Murano.</p>
MOLATURA	<p>Lavorazione di rifinitura eseguita a freddo dopo che i prodotti sono usciti dalle muffole che consiste nell'eliminazione dei punti di attacco alle canne da soffio dagli oggetti.</p> <p>Cold finishing process carried out after the objects have come out of the kiln. It consists in eliminating sharp edges left when the glass was detached from the blowing pipe.</p>
SOFFIATURA A BOCCA	<p>Classica tecnica di lavorazione del vetro per ottenere oggetti cavi. Nata probabilmente in Siria ebbe poi grande diffusione nelle vetrerie romane, islamiche, veneziane. La modellazione di un oggetto cavo viene effettuata dal maestro coadiuvato dai suoi aiutanti con l'uso della <i>canna da soffio</i>, di <i>borselle</i> e <i>tagianti</i>. La soffiatura costituisce una delle invenzioni più rivoluzionarie nella tecnica vetraria e la sua scoperta si fa risalire tra il I secolo a.C. e il I secolo d.C. La soffiatura del vetro attinto dal crogiolo, viene avviluppato intorno all'estremità inferiore. La soffiatura</p>

_Glossario Glossary

SOFFIATURA A BOCCA **consente di ottenere oggetti dotati di cavità interna come vasi e bottiglie bracci ecc.**
 Traditional glass-blowing technique that produces hollowed objects. It probably originated in Syria and then spread to the Roman, Islamic, and Venetian glass factories where it was widely employed. The process is carried out by the master (maestro) assisted by his helpers with the use of a canna da soffio (blowing pipe), borselle (tongs) and tagianti (shears). Blowing is one of the most revolutionary inventions in glassmaking and dates back to around I century BC and I century AD. The blowing process begins by gathering from the crucible a layer of molten glass on the end of the blowing pipe and then rolling it out on a table. Blowing allows the blower to create hollowed objects such as vases, bottles, chandelier branches etc.

Persone Personnel

PIAZZA **Personale indispensabile per eseguire la lavorazione del vetro. La piazza è formata da un maestro, un servente, un serventin e un garzonetto.**
 Personnel who are indispensable in order to carry out the art of the glass making. The piazza includes a maestro, a servente, a serventin, and a garzonetto.

MAESTRO **Figura leggendaria nell'ambito dell'arte vetraria muranese, individuabile nella persona dotata di maggiore esperienza all'interno di una vetreria. Rappresenta il vertice gerarchico della piazza, occupandosi del generale funzionamento della stessa.**
 Legendary figure in the field of Murano glass-making, the person with the most experience in a glass factory. The Maestro is at the top of the piazza hierarchy and oversees its operations.

SERVENTE **Rappresenta la seconda figura nella gerarchia della piazza. Si tratta del primo aiutante del maestro, suo diretto e fidato collaboratore in tutte le mansioni di elevato contenuto tecnico e artistico.**
 Second in the piazza hierarchy. The servente is the Maestro's first assistant and his direct and trusted collaborator in all the tasks requiring highly technical and artistic experience.

SERVENTIN **Rappresenta la terza figura nella gerarchia della piazza, ed esegue le opere dopo il maestro e il servente.**
 Third in the piazza hierarchy. The serventin performs his tasks after the maestro and the servente.

GARZONETTO **Rappresenta la figura di apprendista nella gerarchia della piazza, al quale vengono affidate le mansioni più semplici e umili.**
 The apprentice within the piazza hierarchy. The garzonetto is entrusted to carry out the simplest tasks.

Produzione Production

BRACCIO **Elemento in vetro simile ad un tubo e cavo all'interno per il passaggio del cavo elettrico. Viene fissato da un lato al centro del lampadario e dall'altro lato viene montato il passacavo e la tazza e/o paralume per l'inserimento della lampadina.**
 The braccio (arm or branch) is a hollow glass element, similar to a pipe, where the electric cable passes through. One end of the branch is fixed onto the centre of the chandelier; on the other end are mounted the cable gland and cup and/or lamp shade where the light bulb is fitted.

FINALE **È la penultima decorazione inferiore dei classici lampadari veneziani. Può avere svariate forme e di norma è munito di una rondella metallica filettata per poterlo avvitare alla montatura metallica del lampadario. Attaccato con filo d'argento al finale è spesso il "fiocco".**
 It is the second-last decoration found on the bottom of a traditional Venetian chandelier. It can have various shapes and is normally equipped with a threaded metal washer to fix it onto the metal frame of the chandelier. Normally, a fiocco with a silver cord is attached to the finale.

FONDINO **Cover in vetro a forma di coppa che racchiude la parte metallica forata sulla quale vengono inseriti i bracci, i fiori, le foglie e le decorazioni.**
 Cup-shaped glass element that covers the perforated metal part onto which the branches, flowers, leaves and decorations are fitted.

PASSASÒRZE Simile ad un "distanziatore" tra il fondino e il finale del lampadario classico veneziano, il passasòrze, letteralmente "passatopo", è un cilindro in vetro, leggermente più stretto nel centro e a forma di rocchetto.

Type of spacer between the fondino and finale of a traditional Venetian chandelier. The passasòrze, literally "mouse pass", is a glass cylinder, slightly narrower at the centre and shaped like a spool.

REZZONICO Tipologia di lampadario composto da centinaia di pezzi che, grazie alle sue parti modulari, può arrivare a dimensioni molto importanti, fino a sette metri di altezza e quasi tre metri di diametro. Il nome Rezzonico deriva da una delle più importanti famiglie nobili veneziane e dal fatto che il primo esemplare fu installato nel salone principale di Ca' Rezzonico a Venezia.

Type of chandelier made up of hundreds of pieces which, thanks to its modular parts, can reach very impressive sizes, up to seven metres high and almost three metres in diameter. The name Rezzonico derives from one of the most important Venetian noble families and from the fact that the first of its type was installed in the main hall of the palazzo Ca' Rezzonico in Venice.

Strumenti Tools

BORSÈLLA È costituita da una pinza elastica a forma di molla da caminetto. Rappresenta uno degli strumenti di lavoro fondamentali dell'arte vetraia adempiendo alla funzione di strozzare, modellare e dare forma agli oggetti. Rappresenta una vera e propria prosecuzione della mano del vetraio. Esistono borselle differenti destinate a specifiche operazioni di modellatura: da siègar (per segare, strozzare), da pissegàr (per pizzicare), a gelosia (terminate con platte piccole incise da segni incrociati), a scuelòto (a forma di cucchiaio), a coppo (a forma di tegola), a gàtolo (con incavo trasversale), a do gitoli (con due incavi trasversali), a sguataròn (con molti incavi trasversali), a spin de pesse (a spina di pesce), lissie (piatte larghe senza modellatura).

Flexible fire-type tongs. It is one of the most essential tools of the glass-making art and is used for pressing, modelling and shaping the objects. It can be considered as a real extension of the glass-maker's hand. There are different types of borselle for specific modelling processes: siègar (cutting, pressing), da pissegàr (for pinching), a gelosia (with small flat ends with criss-crossed marks), a scuelòto (spoon-shaped), a coppo (roof-tile shaped), a gàtolo (with traverse groove), do gitoli (with two traverse grooves), a sguataròn (with many traverse grooves), a spin de pesse (herringbone), lissie (wide, smooth and flat).

BRONZIN Necessario per premere la forma voluta dal maestro, il bronzin è un piano di appoggio sul quale il bolo appena estratto dal forno viene compresso e lavorato.

Flat surface or marver. The bronzin is the where the maestro rolls and presses the molten glass extracted from the kiln to the shape required

MAGIÒSSO Questo utensile consente di arrotondare la pea per migliorare la precisione della forma. È costituito da una mezza sfera concava dotata di manico, interamente realizzata in legno. Utensile L'etimologia si fa risalire al termine francese mailloche da cui il verbo dialettale veneto maggiossaàr.

The tool with which the pea molten glass is rounded in order to improve the precision of the shape. The magiòsso is bowl-shaped and equipped with a handle and entirely made of wood. The etymology can be traced back to the French term mailloche from which the Venetian verb maggiossaàr derives.

PALETTA Una spatola in legno che viene utilizzata dal vetraio nella fase di modellazione formale dell'oggetto.

Wooden spatula that the glassmaker uses to form and model an object.

SCAGNO Si tratta della seduta sulla quale il maestro vetraio trascorre la maggior parte del suo tempo. Un semplice scanno munito di due prolunghie parallele in legno rivestito di un piatto in ferro su cui l'operatore mediante un rotolamento di va e viene della canna esegue una sorta di movimento di "tornio orizzontale" che gli consente una lavorazione omogenea del pezzo da eseguire.

The seat where the maestro glassmaker spends most of his time. A simple wooden stool, with two parallel wooden extensions on each side covered with an iron plate on which he rolls the blow-pipe back and forth, performing a sort of "horizontal lathe" movement that lets him uniformly shape the glass.

_Teodato

Design Sylcom LAB

– Una nuova formula di bellezza classica che esalta la luce inglobandola nelle nobili forme del vetro. Linee semplici e sinuose ridefiniscono le sagome tradizionali per proporre un lampadario al tempo stesso elegante e moderno. Le componenti, interamente realizzate in vetro soffiato e proposte in numerose varianti cromatiche, presentano una superficie liscia che enfatizza i giochi di trasparenza e gli effetti vibranti della luce. La gamma si completa con una versione più raffinata che arricchisce le linee di Teodato con l'integrazione degli elementi decorativi a pastorale.

– A new formulation of classic beauty that enhances and incorporates the light into stylish glass configurations. Teodato offers an essential, sinuous design that redefines traditional outlines in order to create a chandelier whose style is both elegant and modern. The components - entirely made of blown glass in a wide range of tones - feature a smooth surface that emphasizes transparencies and vibrant light effects. The Teodoro range includes an extra-refined version whose contours are enhanced with curvilinear pastorale decorative elements.

Design Sylcom LAB

— Un disegno rigoroso e deciso caratterizza l'eleganza di questa collezione interamente realizzata in vetro soffiato e caratterizzata da elementi decorativi a ricciolo e da campane sagomate che contengono e orientano la sorgente luminosa. La famiglia comprende lampade a sospensione e plafoniere, il cui ingombro consente l'installazione in ambienti di altezza ridotta. La gamma si completa con una preziosa versione realizzata in oro 24 carati applicato a caldo durante la lavorazione.

— An eye-catching design characterizes the elegance of this collection entirely made of blown glass and distinguished by curled decorative elements and lovely shaped bells that hold and direct the source of light.

The Venier range includes hanging and wall versions with sizes that allow them to be installed in rooms with low ceilings.

The range also includes a precious version created with *24 carat gold*, applied while the glass is hot.

_Grimani

Design Sylcom LAB

– **Ispirazione floreale e cura nei dettagli donano a Grimani una raffinata eleganza adatta ad ogni tipo di ambiente. Un collezione dall'alto valore artigianale, le cui componenti sono interamente realizzate a mano con l'antica tecnica del vetro soffiato. La forma sinuosa della mazza centrale e l'apertura delle tazze sono ottenute tramite un un taglio a forbice praticato sulla massa vitrea ancora calda. La gamma si completa con una preziosa versione realizzata in oro 24 carati applicato a caldo durante la lavorazione.**

– The floral-inspired lines and care to detail give Grimani a refined style that makes it perfect for all types of interiors. A collection offering superior artisan value with components entirely hand-blown according to Venetian tradition. The sinuous shape of the central piece and flared edges of the cups are cut and modelled with shears while the glass is hot. The range also includes a precious version created with 24 carat gold, applied while the glass is hot.

_Giustinian

Design Sylcom LAB

– Forme eleganti, decorazioni manuali, materiali preziosi si incontrano in una collezione senza tempo.

Giustinian rappresenta la quintessenza del lampadario classico, frutto di un artigianato autentico il cui valore si percepisce nella cura dei dettagli, nei raffinati decori e nella tradizionale lavorazione a *morise* di fondi, tazzine, foglie e fiori. Un gioco armonico di geometrie e chiaroscuri enfatizzato dalle trasparenze e dai colori in pasta.

La gamma si completa con una preziosa versione realizzata in oro 24 carati applicato a caldo durante la lavorazione.

– Elegant shapes, hand-fashioned decorations and precious materials are combined in a timeless collection. Giustinian represents the quintessence of the classic chandelier, the result of expert craftsmanship whose value can be perceived in the care to detail, the refined decorations, and the in traditional *morise* end pieces, cups, leaves and flowers.

Transparencies and *paste* colour contrasts create a play of silhouettes and chiaroscuro effects. The range also includes a precious version created with *24 carat gold*, applied while the glass is hot.

_Rezzonico

Design Sylcom LAB

— Un alternarsi di forme, colori e arditezze artigianali che celebrano i livelli più alti della lavorazione del vetro e danno vita a un lampadario simbolo di Venezia nel mondo. *Alzatine*, piramidi, fiori, foglie, tazzine, fondini e finali rappresentano piccoli capolavori di artigianalità realizzati dai mastri vetrai per mezzo di pinze forbici e tiranti. La sorgente luminosa è contenuta all'interno di tazze aperte a mano e lavorate nelle *morise* grazie alla tecnica della lavorazione a caldo.

La collezione è composta da lampadari di varie dimensioni che, nelle versioni più grandi, sono costituiti da oltre 800 componenti in vetro.

— Diverse contours, colours and artisan creativity underline the ultimate in glass-making skills, making Rezzonico a lighting fixture that symbolizes Venice throughout the world.

Alzatine elements, pyramids, flowers, leaves, cups, bases and end pieces are all true works of art created by master glassmakers using shears, pliers and rods.

The source of light is housed in cups that are and crafted by hand with the *morise* technique. The collection is composed of lighting fixtures coming in a variety of sizes which in the larger versions include over 800 glass components.

_Bucintoro

Design Sylcom LAB

— Un nome altisonante per una collezione legata alla storia di Venezia e destinata a perpetuare nei secoli la tradizione vetraia della città lagunare.

Forme, finiture e dettagli si ispirano alle lanterne che ornavano il Bucintoro, la nave dei dogi, per moltiplicarsi in più di quattrocento componenti in vetro. *Bossole*, *sottotazza*, *passasorse*, cornucopie, puntali e pastorali vengono interamente realizzati a mano per essere assemblati in una collezione di lampadari dal forte impatto decorativo proposti in varie misure e colorazioni.

— A grandiose name for a collection linked to the history of Venice and designed to perpetuate the Venetian glass-making tradition throughout the centuries.

The contours, finishes and details are inspired by the lanterns that adorned the Doges' magnificent ship named Bucintoro. The chandelier is composed of over four-hundred glass components.

Bossole, cup bases, *passasorse* spacers, cornucopias, end pieces and curvilinear *pastorale* elements are entirely made by hand in order to provide a collection of lighting fixtures with a gorgeous decorative effect in a wide range colours and sizes.

_Dandolo

Design Sylcom LAB

– Una pioggia di luce invade l'intero lampadario e si propaga nell'ambiente circostante grazie alla magia dei lustrini. Per mezzo della rifrazione, le facce delle *bobeche* e dei pendagli in cristallo di alta finitura, creano uno vero e proprio spettro colorato dall'effetto suggestivo e onirico. La lavorazione artigianale del vetro impreziosisce la collezione per mezzo di bracci e *pastorali* lavorati a mano secondo la tecnica del *torciglione* che ricorda l'intreccio di una corda.

– A cascade of light floods the lighting fixture and extends to the surrounding area via the magical effect of the spangles. The refraction of light on the surfaces of the *bobeche*s and highly polished crystal pendants create a dreamlike spectrum of gorgeous colours. Manual glass-making skills enhance the collection with handmade branches and curvilinear *pastorale* elements achieved via the *torciglione* technique that recalls the interlacing of cords.

— Brillanti pendagli ed eleganti paralumi sono i tratti distintivi di una collezione dal carattere romantico che riempie di atmosfera gli ambienti con un design senza tempo. In Michiel la luce elegante e soffusa si combina con il dinamismo degli effetti luminosi derivanti dalla presenza dei lustrini che, per mezzo della rifrazione, creano molteplici bagliori colorati dal grande impatto scenografico.

— Brilliant pendants and elegant lamp shades are the hallmarks of this timeless romantic collection created to provide interiors with an exquisite atmosphere. In Michiel the elegant, subdued light is alternated by the brilliant radiance of the spangles that create countless flashes of colour with a highly scenic effect.

Design Sylcom LAB

– **Equilibrio e simmetria definiscono la rigorosa eleganza di questa collezione, le cui linee tradizionali si evolvono in uno stile adatto a ogni tipo di ambiente. La composizione è caratterizzata dalla forma inedita dei bracci che vengono annodati e rigati durante la lavorazione del vetro soffiato. La famiglia si compone di diversi formati e dimensioni adatte anche ai grandi ambienti, completandosi con una preziosa versione realizzata in oro 24 carati applicato a caldo durante la lavorazione.**

– Balance and symmetry define the rigorous elegance of this collection, whose traditional lines evolve in a style suitable for all types of interiors.

The composition is characterized by the innovative shape of the branches that are coiled and lined during the glass blowing process. The range is proposed in diverse configurations and sizes for application in either standard or spacious interiors and also includes a precious version created with 24 carat gold, applied while the glass is hot.

_Candiano

Design Sylcom LAB

— Una presenza iconica contraddistinta da un tratto delicato e da curve eleganti che si adattano perfettamente agli ambienti classici e agli spazi contemporanei. La tradizione delle sue componenti in vetro soffiato interamente lavorato a mano si trasforma atualizzandosi nei colori di tendenza. Grazie alle sue curve avvolgenti Candiano occupa con classe e dinamismo ogni tipo di spazio.

— An iconic model characterized by a stylish design with elegant curves that made it ideal for classic and contemporary interiors alike. The tradition of fully handmade blown-glass components is skillfully modernized by the trendy hues. Thanks to its enveloping curves Candiano is guaranteed to provide class and dynamism to all types of interiors.

Design Sylcom LAB

– Le linee storiche incontrano il design contemporaneo per proporre una collezione dal fascino e dall'eleganza intramontabili. Un volume articolato che si fa dinamico e leggero grazie alla vibrazione luminosa delle superfici lisce in vetro soffiato che alternano i bracci trasparenti alle tazzine realizzate con la tecnica dell'*incamiciatura*. La cura nei dettagli è sottolineata dalle componenti in metallo cromato o dorato che si adattano ai gusti e alle destinazioni d'uso.

– Historical lines combined with contemporary design give the Corner collection a timeless charm and elegance. An essential design whose lines are both vigorous and graceful thanks to the radiance of the smooth blown-glass surfaces that alternate transparent branches with cups crafted with the *incamiciatura* technique. The care to detail is highlighted by the chrome or gold-plated metal components that adapt with ease to specific tastes and intended use.

_Candel

Design **Andrea Lazzari**

— **Candel è una collezione di lampadari e applique dalle linee semplici e rigorose i cui componenti sono in perfetta proporzione l'uno con l'altro. Al termine di ogni braccio, la sorgente luminosa è stata racchiusa in una sfera in vetro soffiato, realizzata rigorosamente a mano da esperti maestri vetrai. Il disegno essenziale e al tempo stesso decorativo si inserisce perfettamente in qualsiasi ambiente non solo dedicato alla casa, ma anche agli spazi contract, con massima libertà di personalizzazione.**

— A collection of chandeliers and wall lamps with essential, rigorous lines whose components are all perfectly proportioned. The source of light at the end of each branch is enclosed in a blown glass globe, rigorously handmade by skilled glass-making masters. The essential yet decorative design makes Candel easy to customize and thus perfect for the home as well as for all types of interiors, including contract areas.

_Gritti

Design Sylcom LAB

— La reinterpretazione di un classico per trasferire l'arte vetraria veneziana negli ambienti contemporanei laddove Gritti diventa protagonista con le sue forme tondeggianti che evocano atmosfere intime e accoglienti. La parte centrale del lampadario è composta da un alternarsi di mazzette in vetro soffiato trasparente e sfere schiacciate in vetro soffiato incamiciato. Le superfici lisce delle sfere delle tazze si alternano ai bracci e alle mazzette lavorate con la tecnica del rigadin. Gritti è proposto nei colori Denim e Grey abbinati a dettagli in metallo a finitura cromo. La gamma è impreziosita da una versione in oro 24 carati applicato a caldo durante la lavorazione e dettagli in metallo dorato.

— Gritti offers a reinterpretation of a classic that transfers the art of Venetian glass-making to contemporary interiors where its appealing rounded design creates a warm and welcoming atmosphere.

The central part of the chandelier is composed of clear blown-glass elements alternated with elliptical *incamiciato* blown glass globes. The smooth surfaces of the globes of the cups create a lovely contrast with the branches and elements crafted with the *rigadin* technique.

Gritti is proposed in Denim blue and Grey combined with chrome-plated metal details. The range also includes a precious version created with 24 carat gold, applied while the glass is hot, and gold-plated metal details.

_Modà

Design **Domenico Rinaldi**

— Modà nasce dal gesto romantico che ripercorre la sagoma delle parti principali che costituiscono e caratterizzano il lampadario classico veneziano in vetro di Murano secondo un profilo geometrico continuo. Tale atto è compiuto mediando e semplificando il passaggio tra gli elementi ottenendone idealmente uno solo che sporge in alto ed in basso come traccia rispettivamente di foglia e braccio. Il risultato è una scultura in vetro che racconta il suo passato con decisione, semplicità ed eleganza.

— Modà is the result of a romantic design replicating the contours of the main parts that compose and exemplify a classic Venetian chandelier in Murano glass according to a continuous geometric outline. This design is achieved by streamlining the part that joins the elements, ideally creating only one that protrudes upwards and downwards like the contour of a leaf and branch respectively. The result is a glass sculpture that narrates its past with decision, essentiality and refinement.

_Festa

Design De Bona De Meo

– Una collezione ispirata ai tradizionali lampadari in stile impero che ornavano i saloni delle feste e i gran balli delle prestigiose corti europee del XIX secolo. I decori sontuosi, la monumentalità dei volumi, le brillantezza dei cristalli e delle dorature si traducono in segni essenziali. Le memorie di antichi splendori si cristallizzano in tubi di vetro soffiato curvati ad arte e cinti da eleganti fasce di metallo. Il Neoclassicismo incontra l'Industrial attualizzandosi in una sospensione dalle dimensioni, dalle trasparenze e dai cromatismi adatti al gusto contemporaneo.

– A collection inspired by the traditional empire-style chandeliers that adorned the grand ballrooms of the illustrious nineteenth-century European courts. The magnificent decorations, the breathtaking size, the brilliance of the crystals and gilding are translated into essential symbols. The memories of the splendors of the past are crystallized in artistically curved blown glass tubes encircled with elegant metal bands. Neoclassic and Industrial styles are combined in order to propose an updated hanging version whose size, transparencies and colours comply with contemporary tastes.

Design Sylcom LAB

— La maestria artigiana si manifesta nelle originali evoluzioni del vetro. Un gioco di curve e trasparenze, decori rigorosi e dettagli metallici definisce la particolarità di una collezione di forte valore decorativo che si adatta con carattere sia al gusto classico che a quello contemporaneo. La collezione è composta da sistemi lineari, lampadari a sospensione e parete proposti in svariati colori e dimensioni.

— The superior craftsmanship is expressed in the highly original glass loops and rings. A play of curves and transparencies, rigorous decorations and metal details provide character and decorative effects that make Street the perfect choice for both classic and contemporary tastes. The collection is composed of linear lighting systems, as well as hanging and wall versions in various colours and sizes.

Design Sylcom LAB

– I sottili rimandi formali alla tradizione estetica del passato caratterizzano le linee di una collezione al tempo stesso classica e moderna. Una pacata eleganza che alterna le trasparenze del vetro alle vibrazioni dei dettagli cromati. L'estremità dei bracci può essere impreziosita da inediti paralumi i cui riflessi metallici atualizzano il lampadario rendendolo perfetto per gli ambienti contemporanei.

– The subtle references to the creative tradition of the past characterize the lines of this collection which is both classic and current. A serene elegance alternates transparencies with eye-catching chrome-plated details. The branches can be fitted with unique lamp shades whose brilliant metal gives the chandelier a modern touch, making it ideal for contemporary interiors.

Design Sylcom LAB
Restyling Massimo Tonetto

— Un design coinvolgente che si inserisce in tutti i tipi di ambiente con esuberanza delle forme e funzionalità. Come in un'esplosione di vetro opaco o trasparente, i bracci curvilinei si espandono dalla coppa in metallo rivestita di vetro per trasportare la luce in varie direzioni e illuminare il contesto con un meraviglioso effetto scenografico.

— An appealing, functional design with vibrant outlines suited for all types of interiors. The curved, opaque or clear-glass branches extend from glass-coated metal cups and project the light into various directions, creating an enchanting atmosphere in the room.

_Lulù

Design **Domenico Rinaldi**

— Il vetro fuso versato su un piano tende a espandersi dal centro alla periferia in cerchi concentrici. La sua corsa finisce quando incontra un elemento anulare che lo argina definendone la dimensione.

Lulù nasce dalla volontà di tradurre questo semplice gesto creativo e di sintetizzarlo in una lampada attraverso il recupero formale dell'anello. Esso infatti diventa l'elemento decorativo che illumina, in questo caso dalla periferia al centro, il vetro che lo contiene.

— Here, the molten glass poured over a surface extends from the centre to the edge in concentric circles. The glass stops flowing when it encounters a ring-shaped element that limits and defines its size.

Lulù results from the desire to translate this very simple creative procedure into a lighting element via a precise renewal of the ring. The ring in fact becomes the decorative item that lightens up the glass it holds, from the edge to the centre in this case.

_Bon Bon

Design **Andrea Lazzari**

— **Bon Bon è una collezione di lampade che si ispira all'antica lavorazione Veneziana delle perle in vetro. Tradizione e gioco si mescolano riportandoci all'infanzia ad infilare dei "Bon Bon" e creando dei fantastici e coloratissimi gioielli di zucchero! In questo caso il risultato finale non è un gioiello, ma una fantastica ed incredibile lampada. Personalizza la tua lampada, selezionando la dimensione, le varie forme e i colori. Con Bon Bon le possibilità sono infinite.**

— **Bon Bon is a collection of lighting proposals inspired by the ancient Venetian art of crafting glass beads. Tradition is merged with a design that takes us back to the childhood game of stringing bonbons to create wonderfully coloured sweets that look like jewels. Here, the final result is not a jewel but a fabulous lighting fixture that can be endlessly customized by selecting sizes, colours and variety of shapes.**

— Pensata per portare nei contesti attuali la storia della tradizione vetraia veneziana, questa collezione è composta da dischi e sfere in vetro soffiato le cui superfici finemente lavorate esprimono il loro valore attraverso la luce che gioca con superfici, finiture e colori. Con la sua eleganza Igloo regala un tocco di stile agli ambienti in cui si inserisce adattandosi alle esigenze progettuali sia nella versione singola che nell'installazione a gruppo.

— Igloo was designed to transmit the history of the Venetian glassmaking tradition into present-day interiors. The collection is composed of blown-glass discs and globes whose finely crafted surfaces express their value through plays of light on surfaces, finishes and colours. Igloo's elegance gives a touch of style to the rooms, superbly adapting to design needs whether installed individually or in groups.

ICLOO

—Diva
Suspension 0220 K AMT

_Diva

Design Massimo Tonetto

— La composta eleganza di Diva evoca le linee sinuose delle sculture classiche che raffiguravano sensuali divinità femminili. Il vetro soffiato si mostra nella sua essenza più pura giocando con le trasparenze, i colori tenui e le scanalature. La lampada sembra disegnata dalla luce che percorre le superfici lisce e moltiplica i riflessi. Quasi impercettibile, la sorgente luminosa posta all'esternità inferiore, garantisce un'illuminazione diretta ideale sia nella versione singola che in composizione.

— The composed elegance of Diva evokes the sinuous lines of the classic sculptures representing sensual female deities. Blown glass is revealed in its purest essence via a play of transparencies, soft tones and grooves. The fixture appears designed by the light that flows along the smooth surfaces creating mirrored effects. Almost imperceptible, the light source housed in at the lower part ensures ideal direct lighting whether installed individually or in groups.

Design Oriano Favaretto

— La spuma di mare, *aphros* in greco antico, da cui nacque la dea Afrodite si materializza in piccole sculture di vetro ricche di atmosfera, colore e magia. Una collezione di lampade da sospensione, parete e soffitto realizzate in *vetro soffiato*. Una varietà di forme e colori che, grazie alla luce, si accendono mostrando la bellezza della materia e giocando con i contrasti della superficie liscia costellata di minuscole bolle. *Aphros* è proposta anche sotto forma di sistema per composizioni multiple per adattarsi alle più svariate interpretazioni progettuali.

— The sea foam – or *aphros* in ancient Greek – from which the goddess Aphrodite was born materializes in the form of small glass sculptures full of charm, colour and appeal. A delightful collection of blown-glass lighting fixtures proposed in hanging, wall and ceiling versions. The variety of shapes and colours attractively light up and reveal the beauty of the glass and play of contrasts on the smooth surface peppered with mini bubbles. *Aphros* is also proposed as a system for group compositions that can be adapted to the most wide-ranging design needs.

—Korinthos
Suspension 0030 K BL

_Korinthos

Design **Paolo Francesco Piva**

— Se le linee classicheggianti che evocano i fusti di antiche colonne donano eleganza alla collezione Korinthos, i volumi essenziali delle componenti in vetro le conferiscono un carattere di adattabilità ad ogni tipo di ambiente sia nella versione a sospensione che nelle varianti a parete. La sorgente luminosa nascosta al suo interno si espande sfumandosi nelle scanalature superficiali generando un effetto chiaroscurale capace di ravvivare con dinamismo vibrante la semplicità formale.

— Korinthos' elegant lines evoke the grace of ancient columns and the essentiality of its glass components make it highly adaptable to any type of interior, whether in pendant or wall versions. The source of light concealed inside flows along the grooves of the surface creating a lovely chiaroscuro effect that enhances the formal essentiality with vibrant dynamism.

_Sweet

Design **Andrea Lazzari**

– Un senso di morbidezza ed eleganza caratterizza la collezione Sweet le cui curve, sapientemente realizzate attraverso la tecnica del vetro soffiato a stampo, combinano ispirazioni legate ai fondali marini o agli antichi stampi da pasticceria. Grazie al metodo dell'incamiciatura la densità del vetro bianco latte viene rivestita da una superficie trasparente di varie colorazioni che dona all'insieme un particolare effetto vibrante. La collezione comprende lampade da parete, sospensioni singole in due dimensioni e sistemi componibili a piacere che consentono una versatilità progettuale e numerosi combinazioni cromatiche.

– An effect of breezy elegance distinguishes the Sweet collection. The curvatures are expertly created with the mold-blown glass technique and are inspired by seabed fauna or the baking molds used in days gone by. Via the incamiciatura process the milk-white glass is coated with a clear layer in various tones, giving the entire surface a distinctive vibrant look. The collection includes wall lights and single pendant versions in two sizes as well as versatile modular systems and many colour combinations for customizing according to design needs.

_Casa Blanca

Design Massimo Tonetto

— Si ispira agli storici legami di Venezia con l'Oriente questa collezione dal forte carattere evocativo. Un armonioso accostamento tra geometrie solide e grafismi esotici. La gamma è costituita da lampade da sospensione, soffitto o parete che dialogano con gli ambienti circostanti per mezzo dei riflessi luminosi vagamente onirici. Le versioni realizzate con finitura bianco latte o topazio adattano il prodotto a un gusto contemporaneo e ricercato.

— This highly evocative collection is inspired by the historical relations that Venice had with the Orient. A harmonious combination of appealing shapes and glamorous patterns. The range is composed of hanging, ceiling or wall versions that dialogue with the interiors via dreamlike reflections of light. The versions created with milky white or topaz finishes make the product the perfect thing for refined, contemporary tastes.

_Chaotic

Design **Massimo Tonetto**

– Il vetro si trasforma in una scultura dal forte impatto tridimensionale. Un caleidoscopio di superfici triangolari che diffondono la luce secondo un ritmo dinamico e un'estetica insolita. La sorgente luminosa si diffonde dal centro rivelandosi sotto forma di campiture opache che si alternano a poetiche sfumature cromatiche. La gamma Chaotic si compone di lampade da tavolo, sospensione e parete.

– The glass turns into a sculpture with a powerful three-dimensional effect. A kaleidoscope of triangular surfaces diffuses the light beautifully in dynamic sequence. The source of light radiates from the centre, revealing opaque segments alternated with graceful chromatic hues. The Chaotic lighting range consists of table, hanging and wall versions.

_Emisphaera

Design Sylcom LAB

– **Caratterizzata dalle molteplici sfaccettature della superficie, Emisphaera si caratterizza per un design contemporaneo che reinterpreta i volumi essenziali delle sfere ellittiche.**

Essenzialità e carattere contraddistinguono una collezione di lampade a sospensione, da tavolo, terra e parete proposte in numerose varianti colore. La presenza di Igloo riempie di riflessi geometrici gli ambienti in cui viene inserita, risultando un complemento versatile sia nella versione singola che nell'installazione a gruppo.

– **Characterized by the multiple facets of the surface, Emisphaera offers a contemporary design that reinterprets the essential features of elliptical globes.**

Essential style and appeal characterize this collection that includes hanging, table, floor, and wall lighting fixtures proposed in a wide choice of colour variants.

Igloo floods the room with geometric radiance, making it a highly versatile décor element whether installed individually or in groups.

_Bitta

Design Paolo Francesco Piva

– Un design contemporaneo che trasforma l'essenzialità delle sfere ellittiche in vetro soffiato, in una collezione di appliques dal forte impatto estetico e dal valore poetico. Come le bitte utilizzate nei porti per ormeggiare le barche, gli elementi di questa collezione vengono disposti a piacere assecondando i gusti e le esigenze progettuali. Grazie alla luce nascosta all'interno, la texture a losanghe della superficie si riflette a raggiera creando magici bagliori. Nel caso di composizioni l'effetto si moltiplica in una costellazione luminosa che invade le pareti.

– A contemporary design that transforms the essentiality of elliptical blown glass globes into a collection of wall lamps with a highly aesthetic effect. Like bollard poles used in ports to moor the boats, the elements of this collection are arranged at will according to taste and design needs. The diamond-patterned texture of the surface is radially reflected from the light concealed inside, creating dreamlike flashes. With group installations the effect is multiplied in a glowing constellation that cloaks the walls.

_Tiepolo

Design Sylcom LAB

– La reinterpretazione delle gabbie veneziane in una collezione di sospensioni in cui il vetro viene soffiato all'interno di una struttura metallica che ne caratterizza le forme. Vetro e metallo si uniscono in un unico corpo in cui i contrasti materici e volumetrici costituiscono un classico eterno dalla presenza scenica evocativa.

La collezione Tiepolo è completata da una versione outdoor certificata con grado di protezione IP44.

– This collection reinterprets old Venetian cages and offers hanging versions where the glass is blown within a metal frame that characterizes the shapes. Glass and metal come together in a contrast of solid matter and transparencies offering a timeless classic with a charming old-world appeal.

The Tiepolo collection includes a certified outdoor version with IP44 protection level.

Design Aldo Bruno Maria Teardo
e Arianna Teardo

— Una composizione di voluttuosi nastri di vetro e trame fantasiose che donano dinamismo a una collezione capace di caratterizzare gli ambienti con un senso di serena leggerezza. Il motivo a losanghe delle superfici è ottenuto imprimendo il pattern sul vetro a caldo. La luce percorre le linee curve, si moltiplica nella trama geometrica e si specchia nei dettagli metallici della struttura creando uno scenografico gioco di riflessioni.

— Mocenigo proposes a gorgeous composition of curved, textured glass ribbons and was designed to create an appealing atmosphere in any room. The diamond effect is achieved by impressing the pattern on the glass while hot (*'à caldo'* technique). The light flows along the lines of the patterned surface, highlighting the metal details of the frame and creating a gorgeous play of shimmering light.

– Una collezione proposta sia nei formati standard che nelle grandi dimensioni per adattarsi tanto agli ambienti domestici quanto agli ampi spazi di rappresentanza. Manin incanta per la forza espressiva dei suoi spicchi arcuati ottenuti per mezzo della lavorazione a piastra. La texture geometrica impressa sul vetro a caldo è impreziosita da prismi pendenti che enfatizzano i giochi di rifrazione della luce.

– The collection is proposed in both standard and large sizes in order to make it perfectly suited for the home as well as for large reception rooms. Manin is an enchanting proposal whose expressive power is given by its curved segments achieved with the piastra technique. The geometric pattern impressed on the glass while hot (a caldo technique) is enhanced by the pendant prisms that emphasize the plays of refracting light.

_Gabbiano

Design **Aldo Bruno Maria Teardo**
e **Arianna Teardo**

— Segni istintivi disegnati nel cielo si cristallizzano in delicati nastri di vetro che convergono in un fulcro luminoso. Il vetro lavorato in piastra assume connotati poetici, le superfici sono decorate da un elegante motivo a losanghe che la luce trasmuta in molteplici bagliori. Il risultato è una collezione di lampade distinguibile per la dinamica eleganza che si abbina agli spazi contemporanei o dona carattere agli ambienti classici.

— Faint contours outlined in the sky take the form of delicate glass ribbons that converge into a resplendent fulcrum. The glass created via the plate technique conveys romantic emotions, proposing refined diamond-patterned surfaces that the light diffuses with glowing brilliance. The result is a collection of lighting fixtures whose unique dynamic elegance perfectly suits contemporary furnishing designs and provides character to classic-style interiors.

Wall lamp 1171/52 D GR.A

_Memmo

Design Sylcom LAB

— Un origami di vetro ottenuto grazie alla lavorazione in piastra che coniuga gli effetti luminosi e le superfici tradizionali a un minimalismo di gusto contemporaneo. La collezione Memmo si adatta a tutti i tipi di ambiente grazie alla versatilità delle sue geometrie essenziali che si fanno calde, magiche o preziose a seconda del tipo di finitura. Le caratteristiche sfumature opache sono ottenute per mezzo della sabbiatura che riveste di pigmenti vitrei la superficie trasparente del diffusore.

— The glass origami effect is achieved with the piastra technique that merges radiant facets and traditional features into a minimalist contemporary design. The Memmo collection is ideal for all types of interiors thanks to the versatility of its essential lines that can create a warm, or fairylike or exclusive effect depending on the type of finish. The distinctive opaque hues are achieved with a sandblasting process, which involves coating the diffuser's clear surface with glass pigments.

_Teodora

Design Sylcom LAB

— Un elegante vaso in vetro soffiato, finemente lavorato a scanalature, prende luce per mezzo di un paralume in tessuto plissettato. La collezione Teodora è composta lampade da tavolo in tre dimensioni che la rendono un raffinato complemento d'arredo adatto a vari tipi di utilizzo. Le finiture metalliche in cromo lucido o dorato lucido arricchiscono con la ricercatezza dei dettagli e la lucentezza dei riflessi.

— An elegant blown-glass vase with a finely grooved surface is combined with a pleated fabric lampshade.

The collection is composed of table lights in three sizes that make Teodora an utterly refined interior decor item suitable for various types of use. The polished chrome- or gold-plated finishes of the metal details offer an added touch of refinement as well as extra-bright reflections.

— **Le linee sensuali, le superfici scanalate che giocano con i riflessi luminosi, il design al tempo stesso elegante e minimale, conferiscono a Felicità una grande adattabilità a tutti i tipi di ambiente. La collezione è composta lampade da tavolo proposte in tre dimensioni che si contraddistinguono per l'armonia generata dall'incontro tra la purezza di un design essenziale e il pregio della lavorazione del vetro soffiato.**

— Felicità offers sensual lines and grooved surfaces that create a bright play of reflections, making it both elegant and minimal and suitable for all types of interiors. The collection is composed of table lights in three sizes. Felicità stands for the ultimate in harmony achieved by combining essentiality of design with the value and finesse of blown glass.

— Una collezione di lampade da tavolo e piantane che evoca nelle sue linee sinuose le geometrie dei grandi lampadari, divenendo un complemento luminoso caratteristico per il valore estetico e la qualità artigianale. La combinazione di forme essenziali sapientemente giustapposte, conferiscono a Carola la capacità di dialogare con gli ambienti classici, ma anche di adattarsi con eleganza agli interni di gusto contemporaneo.

— A collection of table and floor-standing lights whose sinuous lines recall the contours of the large chandeliers. Carola is a precious décor item offering exquisite aesthetics and superior craftsmanship. The essential lines are expertly juxtaposed, allowing Carola to suit classic-style interiors as well as offer contemporary areas an added look of luxury.

Design Sylcom LAB

– Una collezione di lampade da tavolo e piantane ispirate ai fasti dello Stile Impero. Gli archetipi del classicismo si traducono in profili, modanature e decori preziosi ottenuti tramite la combinazione delle varie lavorazioni del vetro e l'utilizzo di dettagli in metallo che conferiscono all'insieme rigore ed eleganza. Dea si pone come un oggetto artistico dal forte valore iconico. Ideale come elemento scultoreo per gli arredi sofisticati, funzionale come completamento dei progetti di illuminazione nei quali si integra per affinità stilistica.

– A collection of table and floor-standing lights inspired by the grandeur of the Empire style. Classical elegance is reflected in the splendid contours and decorations attained by combining various glass-making techniques with metal details, making Dea a highly precious, iconic artistic object. An ideal sculptural object for sophisticated interiors.

— Pensata per portare nei contesti attuali la storia della tradizione vetraia veneziana, questa collezione è composta da dischi e sfere in vetro soffiato le cui superfici finemente lavorate esprimono il loro valore attraverso la luce che gioca con superfici, finiture e colori. Con la sua eleganza Igloo regala un tocco di stile agli ambienti in cui si inserisce adattandosi alle esigenze progettuali sia nella versione singola che nell'installazione a gruppo.

— Igloo was designed to transmit the history of the Venetian glassmaking tradition into present-day interiors. The collection is composed of blown-glass discs and globes whose finely crafted surfaces express their value through plays of light on surfaces, finishes and colours. Igloo's elegance gives a touch of style to the rooms, superbly adapting to design needs whether installed individually or in groups.
